Pages, interactivity & functionality

04 **Design & User Experience**
Colour, typography, layout & UX

05 **Technical Requirements**
Stack, hosting & domain

06 **Timeline, Budget & Next Steps**
Milestones and estimated costs

Luxury Designs

About the Brand

An online retail store specialising in premium fashion items including designer-inspired clothing, handbags, jewellery and accessories.

The idea is simple: give people access to stylish, high-quality fashion without needing to visit a physical shop.

Target Audience

Fashion-conscious men & women aged 20–45 who want quality style without full designer prices.

MISSION

To offer customers a smooth, high-end online shopping experience built on quality and style.

VISION

To become one of South Africa's go-to online stores for affordable luxury fashion.

What the Website Aims to Achieve

Grow Online Sales

Drive product enquiries and conversions through a clear, attractive shopping experience.

Build Brand Trust

Present a professional, high-end image that reflects quality and style.

Easy Browsing & Buying

Make it simple for customers to discover products and make enquiries.

Support Future Growth

Build credibility that supports a future transition to physical retail.

Pages & Core Functionality

01	**Home**	Hero banner, brand intro, clear CTAs to Shop & Enquiry
02	**Products**	Dynamic product grid, live search & category filter, lightbox gallery
03	**About**	Brand story, Mission & Vision tabs, Johannesburg location map
04	**FAQ**	Accordion-style questions on shipping, returns, quality & tracking
05	**Enquiry Form**	Product-specific form with full JS validation & success response
06	**Contact Form**	General message form with phone, subject & compiled email feedback

JavaScript Enhancements (Part 3)

Lightbox Gallery

Click any product to view a large image with caption. Fully responsive.

Live Search & Filter

Products load dynamically from a JS array. Instant search + category filter.

Tabs & Accordion

About section uses tabs; FAQ uses expandable accordion panels.

Form Validation

Client-side validation with clear error messages and success feedback.

Interactive Map

Google Maps embed showing the Johannesburg warehouse location.

Mobile Menu

Hamburger menu with smooth toggle for mobile and tablet users.

Visual Identity & UX Principles

Colour Palette

Black | Gold | Off-white | White

Typography

Playfair Display (serif) for headings
Inter (sans-serif) for body text

Layout & UX

- Clean, image-heavy product cards
- Generous white space for focus
- Sticky navigation with gold accent
- Fully responsive (mobile-first)
- Clear call-to-action buttons
- Accessible form labels & errors

Stack, Hosting & Domain

Languages

- HTML5 semantic structure
- CSS3 (custom properties, Grid, Flexbox)
- Vanilla JavaScript (no frameworks)

SEO & Meta

- Title, meta description & keywords
- Open Graph tags
- Descriptive image alt text
- robots.txt & sitemap ready

Hosting & Domain

- Domain: www.luxurydesigns.co.za
- Hosting: GitHub Pages / Netlify (free)
- Alternative: Afrihost for production

Forms & Interactivity

- Client-side validation
- Simulated AJAX success responses
- Lightbox, tabs, accordion, map

Milestones & Estimated Costs

Project Timeline

Week 1–2	Research & Planning
Week 3	Sitemap & Layout Sketches
Week 3–4	HTML Structure
Week 5–6	Styling & Navigation
Week 7	Testing & Bug Fixes
Week 8	Final Submission

Estimated Budget

Domain (yearly)	R150 – R300
Hosting (GitHub/Netlify)	R0
Afrihost (optional)	R200–300/mo
Product Photography	R2,000
Development	R0 (student)

Thank You
